# TAP & CONNECT

## DIGITAL BUSINESS CARD

### Tap Into Advanced Networking: The Future of Digital Business Cards

The last business card you will ever need.

This card comes inclusive of printing and branding and is double sided.

Get your very own personalized NFC/RFID contactless business card made by us and tailored to your specifications.

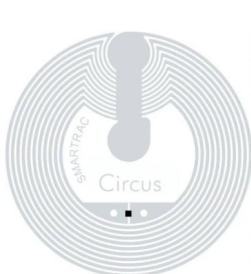

Near-field communication (NFC) business cards enable you to share your contact information with a single tap. NFC business cards have two components: a digital business card and an NFC tag. When you want to share your contact information with another person take your NFC business card, and tap it on the other person's smartphone. Your business card will instantly appear on their screen.

Get your name, company name, contact number, email, website, social media links and any other details you want added to your business card.

### Technical Details :

1. These cards will not work with Non-NFC reading phones like older iPhones or any older brand phone with no NFC capability.
  2. The card or chip must not be in direct contact with sunlight or any other heat source
  3. Each card comes with unlimited taps
  4. The data on the card can be edited at any time by the owner of the card.
  5. The base color of this PVC card is black or White
- Contact us for bulk orders and pricing.

NB: You will need to send us your information and desired design in PDF format so that we can create the card for you.
